PROFESSIONAL SUMMARY
Backend engineer with 6 years of experience building cloud-native payment and data platforms. Strong in Python microservices on GCP with a focus on reliability, APIs, and observability.

SKILLS
Languages: Python, Go, SQL
Cloud: GCP (Cloud Run, Pub/Sub, BigQuery), AWS
Infrastructure: Docker, Kubernetes, Terraform, CI/CD (GitHub Actions)
Data: PostgreSQL, Redis
APIs: REST, gRPC, Protocol Buffers
Other: Microservices, distributed systems, Kafka, observability

EXPERIENCE
Senior Backend Engineer, PagoLuz (2020 - Present)
- Led a Python payments service handling 4M transactions/day on GCP.
- Migrated a monolith to Cloud Run microservices, cutting latency by 40%.
- Built gRPC APIs and mentored four engineers.

Backend Engineer, ShopGrid (2018 - 2020)
- Built REST APIs in Python and PostgreSQL data models.
- Implemented Kafka event pipelines.

EDUCATION
M.Sc., Computer Science - Example University of Madrid (2018)
B.Sc., Computer Science - Example University of Seville (2016)
